D.O. letter No. dated 13th July 1928 from the Principal, ntral College, Bangalore, to the General Secretary to Government.

---

Your D.O. letter No.549/F.247-27-3 d Urgent and Confidential

---

I have consulted Dr. Sampathkumaran in the matter of possible probationers for the State Forest Service. The following are arran -d in order of their scientific attainments, in our opinion: -

1. Kadambi Krishnaswamy, M.Sc., (Calcutta) B.Sc.,(Mysore).

First class and first in State at B.Sc., with Botany (main) and Zoology (subsidiary). was given a scholarship for the M.Sc., degree course at Calcutta. Took the M.Sc., Degree in the first class at head of the list and was awarded the Gold Medal and University Prize (Calcutta). Competed ~~with~~ at the I.C.S. examination and stood first, in India in Botany Lower and in Botany Higher and in Zoology Higher. Tall and well set up fitted for outdoor work.

2. T.K. Krishna Murthi B.Sc.,

First class B.Sc., (Mys.) with Botany (main)and Zoology (sub). Worked as post-graduate scholar and for some time as Demonstrator. Has completed a piece of research work which awaits publication. Of robust constitution and can stand strenuous field work.

3. K.N. Seshagiriah B.Sc.,

First Class B.Sc., (Mys.) with Botany (main) and Zoology (sub) Post graduate scholar for six months and now Demonstrator in the Department. Is engaged on an important piece of research work. His constitution is well suited for field work.

4. B.S. Shamanna.

Secured a first class in the recent B.Sc., degree examination with Botany (main) and Zoology (sub) is now working in the Department as a Demonstrator. well fitted for outdoor work.

Ramakrishnan.

Secured a second class at the recent B.Sc., degree examination with Botany (main) Chemistry (sub) Has a robust consti-

tuti

6. P.A. Timmappiah. ( "P.A.T.iah" in the application)

took a 3rd Class B.A., degree with physics and Mathematics as his optional subjects. I believe he subsequently joined the Medical College but failed to pass the 1st M.B. Examination.

I cannot claim to know much about the different schools of Forestry; but I should imagine that America can hardly afford training so suitable for Indian Forest conditions as that of the Forestry School at Oxford.

S-317 20/19-11 The Director of Industries & Commerce in Mysore,

S i r,

Government consider it necessary that the Sericultural Department should take up organised work ~~for this mulberry plant~~ in the selection, and breeding of the mulberry plant co-ordinated with silk worm rearing to determine the nutrient and industrial value of different varieties of the plant, and the comparative merits of different manures and methods of culture.

For this purpose it is in contemplation to appoint a Probationer to the Sericultural Department on ~~a~~ an initial pay of Rs.50/- per mensem. He should be a B.Sc., who has specialised in Botany or Zoology, with ~~and~~ Chemistry as a subsidiary subject ~~and~~ the selection ~~should be~~ should be made in consultation with Dr.Metcalfe and the Professors of Botany and Zoology. The idea is that a definite plan of work should be prepared in consultation with the Agricultural Department and pursued steadily ~~and purposefully~~ till results are obtained such as could be regarded as a definite contribution to the knowledge on the subject.

In addition to this special work, the Probationer should be put through a course of training calculated to give him a comprehensive grasp of all the branches of the sericultural industry, and fit him ultimately for responsible ~~administrative~~ charges in the Department.

I am to request you to submit your considered proposals furnishing details as to

(1) the place where the Probationer may be stationed (2) the programme of experimental work that may be assigned to him; (3) the manner in which his work may be co-ordinated with that of the Scientific Sections of the Agricultural and Gardens Departments, so as to secure some measure of (technical assistance and) direction ~~at least in the initial stages~~; (4) the special equipment in the way of laboratory appliances required, and (5) the course of general sericultural training proposed to be given to him.

I am to request that an estimate of cost involved - both pay and for laboratory equipment - might be furnished, with an indication of the source from which it could be met.

I have etc.,

Secretary to Government,
Development Departments.

4 MAY 1928
DEVELOPMENT DEPARTMENT

N. Rama Rao, Esq., B.A., B.L.,
Secretary to the Government of Mysore,
Development Departments, Bangalore.

D 9277

SIR,

With reference to your letter No. D. 5317/Seri. 46-27-1 of the 19th November 1927 calling for proposals regarding the appointment of a Probationer in the Sericultural Department, I have the honor to enclose copy of a letter I have received on the subject from the Superintendent of Sericulture. As suggested by the Superintendent, the Probationer may first be deputed for work in Mysore for training in Silk Worm Rearing and the Reeling of silk. He may be stationed at Mysore for about a year and then placed -- under the control of either the Economic Botanist or the Director of Agriculture for training in Mulberry Growing and general plant breeding work. I have requested the Economic Botanist to kindly favour me with a course of training he considers advisable for a Probationer to pass through. I shall submit to Government the proposals of the Economic Botanist as soon as they are received.

The Supt. of Sericulture has been instructed to prepare a detailed course of training

A Probationer may perhaps be appointed and attached to the Department immediately. If these proposals are approved, applications will be invited from B. Sc., Graduates either in Botany or Zoology with Chemistry as the subsidiary subject in consultation with Dr. Metcalfe and the Professors of Botany or Zoology.

I have the honor to be,
Sir,
Your most obedient servant,
C Ranganatha Rao Sahib
Director.

Copy of letter No.5198 dated 9th April 1928 from the Superintend of Sericulture, Mysore to the Director of Industries and Commerce in Mysore, Bangalore.

======

With reference to your No.D4.1734/29th November 1927 forwarding to me copy of letter No.D.5317/Seri.46-27-1 dated 19th idem, I have the honor to state that the Probationer to be appointed should be given training in the several branches of the silk industry for at least one year. During this period he may be stationed at Mysore wherefacilities for training in the several branches of the industry exist. During the course of the training he will be given facilities to visit the several sericultural tracts in the state to study the local variations in the methods of cultivation of mulberry.

After receiving training in the several branches of the industry the probationer may be posted for training in ~~mass~~ selection and plan breeding work under the Director of Agriculture and the Economic Botanist, so that he may receive both theoretical and practical train ing in the breeding work. I think one year's training in all under the Director of Agriculture and the Economic Botanist might be enough The exact period for which the Probationer has to undergo training in breeding work, the details of training , and equipment necessary for laboratory work, etc may kindly be ascertained from the Agriculture and the Gardens Departments. The Director of Agriculture who was requested to give his suggestions in the matter replies in his letter No,D2.Dis.561/27-28 dated 29th November 1927 that he had referred the matte to the Economic Botanist. The Economic Botanist who was addressed by me has not favoured me with any reply till now.

It is possible to meet the pay of the probationer during the current year out of the allotment for scholarships in the current year's budget.

GOVERNMENT OF MYSORE.

DEPARTMENT OF INDUSTRIES AND COMMERCE

OFFICE OF THE DIRECTOR,

*Dated Bangalore, the* 30th June *192* 8.
2nd July -

FROM

C. RANGANATHA RAO SAHIB, ESQ., B.A., B.L.,
*Director of Industries and Commerce in Mysore,*
*(Bangalore India.)*

GEN. & REV. SECRETARIES
3 JULY 1928
DEVELOPMENT BRANCH.

To

H. Rama Rao, Esq., B.A., B.L.,
Secretary to Government of Mysore,
Development Departments, BANGALORE.

SIR,

Seri 46-27-4

Probationer, Sericultural Section of the Department.

With reference to your No.12865/Seri. dated the 4th June 1928 directing that a suitable person may first be selected for the post and necessary action taken thereafter for his training, I have the honour to request instructions from Government as to whether I may advertise and call for applications for the post of a probationer for training in the Sericultural Section.

I enclose for the information of Government copy of letter No.2365 dated the 1st June 1928 from the Director of Horticulture in Mysore giving his opinion in regard to the training of probationer.

As regards the source from which the pay of the probationer is to be met, I beg to state that it does not seem desirable to appropriate funds sanctioned for other purposes at the very commencement of the year, particularly as the grants to this Department are so limited, and I request you to have an additional grant sanctioned for the purpose.

An estimate of the probable cost of training by way of pay, Travelling Allowance and laboratory equipment will be obtained from the Superintendent of Sericulture and forwarded.

'orwarded to Government. Meanwhile I request orders on the
›oints referred to in para 1 and 2 above.

I have the honour to be,

Sir,

Your most obedient servant,

C Ramayan Rao Sahib

D i r e c t o r.

Copy of letter No. 2365 dated 1st June 1928 from the Director of Horticulture in Mysore, Lal-Bagh, Bangalore to the Director of Industries and Commerce in Mysore, Bangalore.

---

With reference to your letter D. O. No. D4-1734/27-28 dated 4th May 1928, I have the honour to state that the Gardens Department will take up the work on conducting experiments on mulberry plants as a part of the Fruit experimental work that is being done in the Department, Before drawing up a course of training on breeding of Mulberry plants it is desirable that a systematic study of the different varieties of mulberry plants, both local and foreign, should be made in order to obtain some vigorously growing plants with rapid and intense leaf production and with high nutrient value. Therefore I request you will be kind enough to send the cuttings of different varieties of mulberry plants which are grown in the garden at Mysore in charge of the Sericultural Department.

A number of lectures on plant breeding will be delivered to the third year students of the Horticultural School from Jaunuary 1929 and a probationer might with advantage attend them. In the meantime, arrangements can be made for training in the general plant propagation work such as sowing, pricking etc., and preparation of cuttings, layering, grafting, budding etc. A knowledge of these things is essential before one takes up the advanced work on plant breedings.

Seri 46-27-7

Dear Mr. Rama Rao,

With reference to your D.O. No. D.2465/Seri.46-27 dated 27-8-1928 and in continuation of our conversation on the following day, I wish to inform you that I have induced Mr.T.K.Krishna Murthy to accept the Probationer's place in the Sericultural Department on Rs.75/- per month during the period of probation. He is the best person available for this place. He has also done some work in Coimbatore in plant breeding.

With kind regards

Yours sincerely,

M.K. Lampathumaran

N.Rama Rao Esq., B.A., B.L.,

Correspondence ending with letter No. 1754-27 dated 3rd August 1920 from the Director of Industries and Commerce regarding the appointment of a Probationer to the Sericultural Department.

---

Order No. 3187-99/ Seri 46-27-8

Dated, Pusa, the 14th October, 1943.

Government consider it necessary that the Sericultural Department should now take up, in co-ordination with silk worm rearing, organised work in the selection and breeding of the mulberry plant to determine the nutrient value of different varieties of the plant and the comparative merits of different manures and methods of culture. Accordingly, agreeing with the Director, Government are pleased to sanction the establishment of a Probationer in the Department and to appoint Mr. [illegible] Krishna Murti, B.Sc., to this post on a pay of Rs.75/- per mensem. In addition to the actual work connected with mulberry cultivation, the Probationer should be put through a course of training as may be calculated to give him a comprehensive grasp of all the branches of Sericultural Industry, such as he will find himself in need, to be in charge of any responsible section of work in the Department. The Probationer would be required to carry out necessary investigations and observations. The Director is requested to draw up a programme of work to be done by the Probationer in consultation with Mr. Coleman and Mr. Kumaran of the Central College and submit the same for the approval of Government. Proposals, if any, that may be necessary for a small laboratory may be submitted after the Probationer is employed and the programme is prepared.

sum of Rs.2000/- as detailed in the margin is sanctioned for this purpose during the current year; and a demand for this amount, will be placed before the Legislative Council at its next session.

GEN. & REV. SECRETARIAT D.24 39
20 SEP. 1928
DEVELOPMENT BRANCH.

SIR,

With reference to Government Order No.D.3187-99/Ser 46-27-8 of the 14th September 1928, copy of which has just been received, I have the honor to state that I feel it my duty to express my views on the question raised by the order. I would not have presumed to do so had it not been that Government have ordered that I should be consulted in drawing up a programme of work.

In the first place, I should like to say that in my opinion, no one officer even were he much more highly qualified than Mr. Krishnamurti could ~~take~~ carry out the general programme marked out for him. Breeding work alone requires a man with long and special training while an investigation of the comparative merits of different manures which, I presume, must involve a consideration of the requirements of the various soils upon which mulberry is grown in addition to the needs of the mulberry plant itself, requires a man of entirely different qualifications and incidentally laboratory equipment and accomodation, which will duplicate in many ways that already available in the Chemical Laboratories of this Department.

The Government Order is silent on the subject of the supervision of work after the programme ~~afxxx~~ is drawn up. My experience of over twenty years convinces me that without expert supervision such as I think I may safely say is not now available in the Sericultural Department (and I speak with knowledge on this point) the time of the officer is likely to be very largely wasted.

As a matter of fact in the Agricultural Department at present, we have or can obtain at very little additional expense faci-

facilities for the very work which Mr. Krishnamurti ~~Rao has~~ has been appointed to do. I would respectfully submit that mulberry is a crop plant similar to those already being investigated by the staff of this Department, that we have a special breeding establishment with a highly ~~qualified~~ trained man at its head, an establishment which will be very materially strengthened if proposals at present before Government are accepted, that we are at present constructing an additional laboratory building part of which is to be devoted to plant breeding work and finally that we have an exceptionally well equipped Chemical Section with a highly trained officer at its head which should be in a position to take up investigations as to the manurial requirements of all important crops in the State.

I trust that my remarks will not be misunderstood. My sole anxiety is to see the work of Agricultural Development in the State proceed as rapidly as possible. The work marked out for Mr. Krishnamurti is as far as I can see purely agricultural in nature and as such can in my opinion be much more efficiently carried out in the existing Agricultural Department than in what will virtually be an Agricultural Section of the Sericultural Department.

I have the honor to be,
Sir,
Your most obedient servant,

Director of Agriculture.

Govt. Order No.3187-99/Seri.46-27-8 dated 14th September 1928 sanctioning the appointment of Mr. T.K. Krishna Murthy, B. as Sericultural Probationer.

Order No. D3 Mdr 3/Sen

Dated, Bangalore, 3rd 1928

Govt. are pleased to lay down the following general directions in regard the training of Mr. T.K.Krishna Murthy

(i) Mr. Krishna Murthy should work in the Sericultural Department in the beginning for such period as the Director of Industries and Comm may consider necessary for giving h a comprehensive idea of sericulture and the relation between Mulberry cultiv vation and the other perts of the industry.

(ii) He should afterwards be deputed to the Agricultural Dept. for train- ing in work of the Sericultural Dep on problems connected with the Mulberry plant.

The Director of Agriculture is requested to keep the Director of Industries and Commerce posted from time to time the progress made by the Probationer during this period
